

SIGCOMM 2011 Call for Papers

ACM Sigcomm 2011

August 15-19, 2011

Toronto, Canada

<http://conferences.sigcomm.org/sigcomm/2011>

Welcome

The 2011 ACM SIGCOMM organization committee is pleased to announce the next annual conference of the ACM Special Interest Group on Data Communication (SIGCOMM) on the applications, technologies, architectures, and protocols for computer communication.

In addition to the main conference, SIGCOMM 2011 will have a series of co-located workshops, a poster and demo session, a travel grant program, and conference best paper and SIGCOMM awards.

Important Dates

Paper Title and Abstract: *January 24, 2011 (20:00 EST)*

Full Paper Submission: *January 31, 2011 (20:00 EST)*

Acceptance Notification: *May 6, 2011*

Conference: *August 15 – 19, 2011*

Dates for workshops, posters, and demos are available from the conference website.

Submissions

SIGCOMM is a highly selective conference where full papers typically report novel results firmly substantiated by experimentation, simulation, or analysis. Submissions can be up to 14 pages in length, in two-column 10pt format. Please see the submission instructions on the conference Web site for complete details. Note that accepted camera-ready papers will be 12 pages in length, in two-column format with 9pt font.

Call for Papers

The SIGCOMM 2011 conference seeks papers describing significant research contributions to the field of computer and data communication networks. We invite

submissions on a wide range of networking research, including, but not limited to:

- Design, implementation, and analysis of network architectures and algorithms
- Economic aspects of the Internet
- Enterprise, datacenter, and storage area networks
- Experimental results from operational networks or network applications
- Fault-tolerance, reliability, and troubleshooting
- Insights into network and traffic characteristics
- Network management and traffic engineering
- Network security, vulnerability, and defenses
- Network, transport, and application-layer protocols
- Networking issues for emerging applications
- Operating system and host support for networking
- Peer-to-peer, overlay, and content distribution networks
- Resource management, quality of service, and signaling
- Routing, switching, and addressing
- Technical aspects of online social networks
- Techniques for network measurement and simulation
- Wireless, mobile, ad-hoc, and sensor networks

Organization Committee:

General Chairs

Srinivasan Keshav, *University of Waterloo, Canada*
keshav@uwaterloo.ca

Jörg Liebeherr, *University of Toronto, Canada*
jorg@comm.utoronto.ca

Technical Program Committee Chairs

John Byers, *Boston University, USA*
byers@cs.bu.edu

Jeffrey Mogul, *HP Labs, USA*
jeff.mogul@hp.com

Organization Committee (continued)

Local Arrangements Chair

Yashar Ganjali, University of Toronto, Canada

Finance Chair

Martin Karsten, University of Waterloo, Canada

Workshop Chairs

Ken Calvert, University of Kentucky, USA

Ellen Zegura, Georgia Tech, USA

Web and Publicity Chair

Nicolas Christin, Carnegie Mellon University, USA

Poster/Demo Chairs

Aditya Akella, University of Wisconsin–Madison

Lili Qiu, University of Texas at Austin, USA

Travel Grant Chairs

Kenjiro Cho, IJ Research Laboratory, Japan

Arun Venkataramani, University of Massachusetts, USA

Giorgio Ventre, University of Napoli, Italy

Publications Chair

Stratis Ioannidis, Technicolor, France

Registration Chair

Georgios Smaragdakis, Deutsche Telekom Laboratories, Germany

Conference Coordinator

Jaudelice de Oliveira, Drexel University, USA

Program Committee

Chairs

John Byers, Boston University, USA

Jeffrey Mogul, HP Labs, USA.

TPC Members

Aditya Akella, University of Wisconsin, USA

Katerina Argyraki, EPFL, Switzerland

Paul Barford, University of Wisconsin, USA

Augustin Chaintreau, Columbia University, USA

David Clark, MIT, USA

Jon Crowcroft, University of Cambridge, UK

Constantinos Dovrolis, Georgia Tech, USA

Will Eatherton, Juniper Networks, USA

Michael Freedman, Princeton University, USA

Sharon Goldberg, Boston University, USA

Matthias Grossglauser, EPFL, Switzerland

John Heidemann, USC/ISI, USA

Kyle Jamieson, University College London, UK

Ramesh Johari, Stanford University, USA

Brad Karp, University College London, UK

Sachin Katti, Stanford University, USA

Arvind Krishnamurthy, University of Washington, USA

Balachander Krishnamurthy, AT&T Labs - Research, USA

Nikolaos Laoutaris, Telefonica Research, Spain

Ratul Mahajan, Microsoft Research, USA

David Oran, Cisco, USA

Jitendra Padhye, Microsoft Research, USA

Venkat Padmanabhan, Microsoft Research, India

Adrian Perrig, Carnegie Mellon University, USA

Lili Qiu, University of Texas at Austin, USA

Byrav Ramamurthy, University of Nebraska-Lincoln, USA

Danny Raz, Technion, Israel

Scott Rixner, Rice University, USA

Timothy Roscoe, ETH Zurich, Switzerland

Mema Roussopoulos, University of Athens, Greece

Stefan Savage, U.C. San Diego, USA

Srinivasan Seshan, Carnegie Mellon University, USA

Devavrat Shah, MIT, USA

Scott Shenker, U.C. Berkeley, USA

Emin Gun Sirer, Cornell University, USA

Vijay Sivaraman, University of New South Wales, Australia

Kun Tan, Microsoft Research, China

Amin Vahdat, Google / U.C. San Diego, USA

Helen Wang, Microsoft Research, USA

Gordon Wilfong, Bell Labs Research, USA

Carey Williamson, University of Calgary, Canada

Walter Willinger, AT&T Labs - Research, USA

Alec Wolman, Microsoft Research, USA

Yinglian Xie, Microsoft Research, USA

Richard Yang, Yale University, USA

Haifeng Yu, National University of Singapore, Singapore

Ellen Zegura, Georgia Tech, USA

Yin Zhang, University of Texas at Austin, USA

Yongguang Zhang, Microsoft Research, China

Heather Zheng, U.C. Santa Barbara, USA
